

РАДИЈУС ВЕКТОР

УПУТСТВО ЗА ПОДЕШАВАЊЕ МЕЈЛ КЛИЈЕНТА “Outlook Express” 6

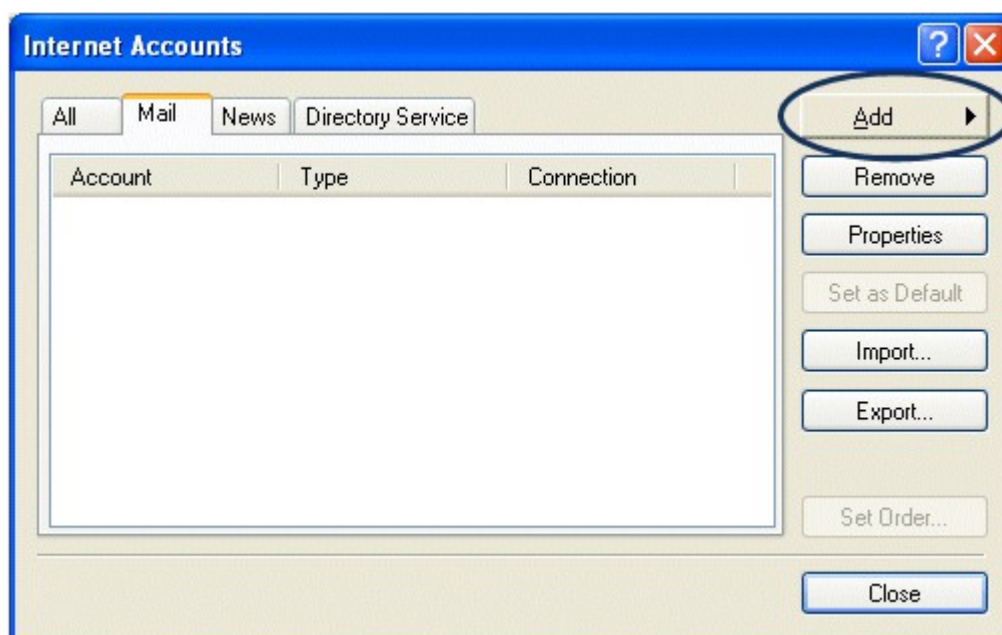

1. Покрените “Outlook Express”.

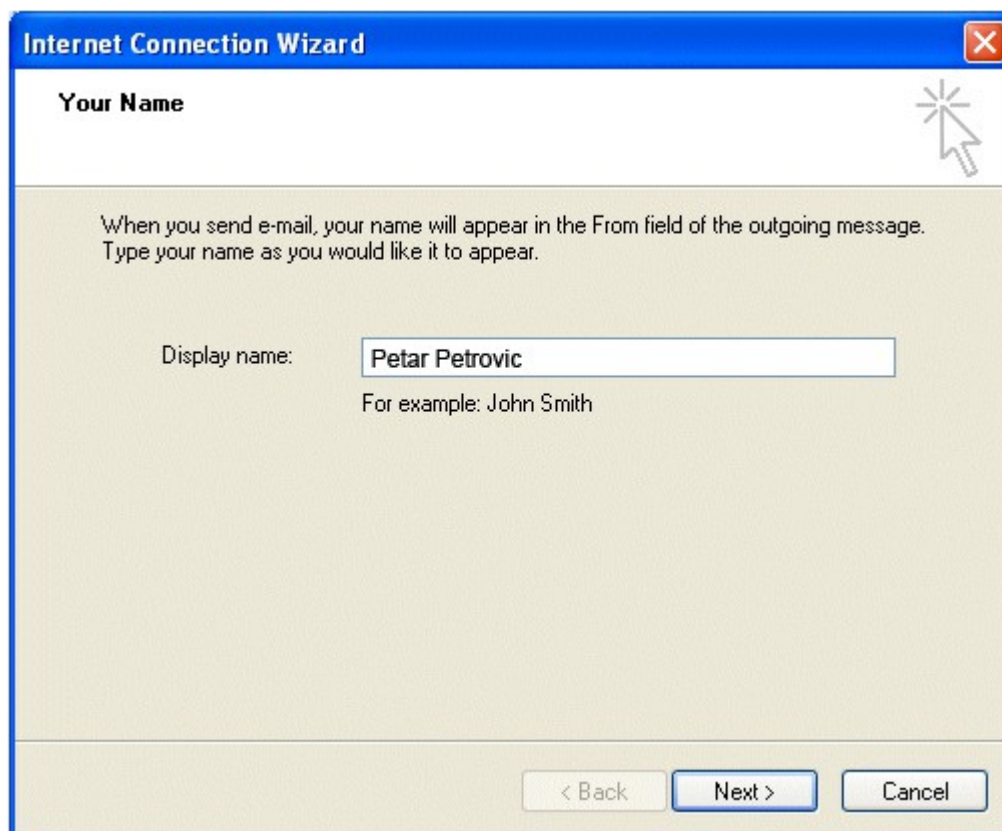

2. Из менија “Tools” одаберите “Accounts”.

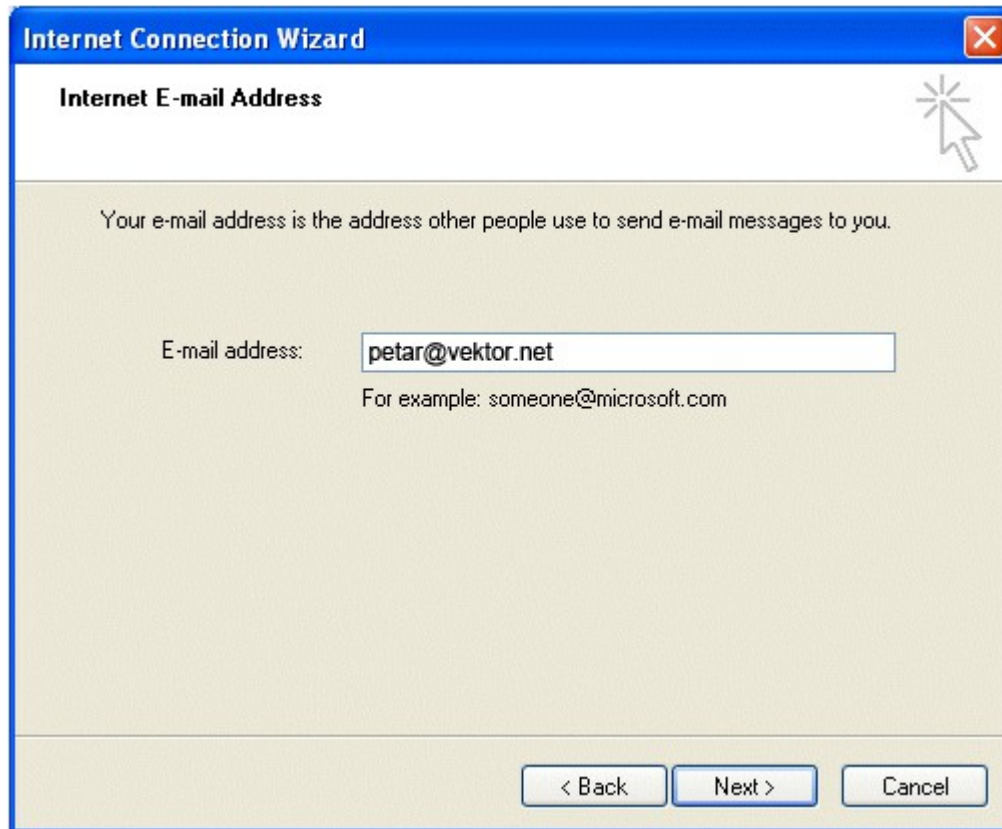

3. Кликните на дугме “Add“ и одаберите “Mail“.

4. У поље “Display name“ упишите Ваше име и презиме и кликните на “Next“.

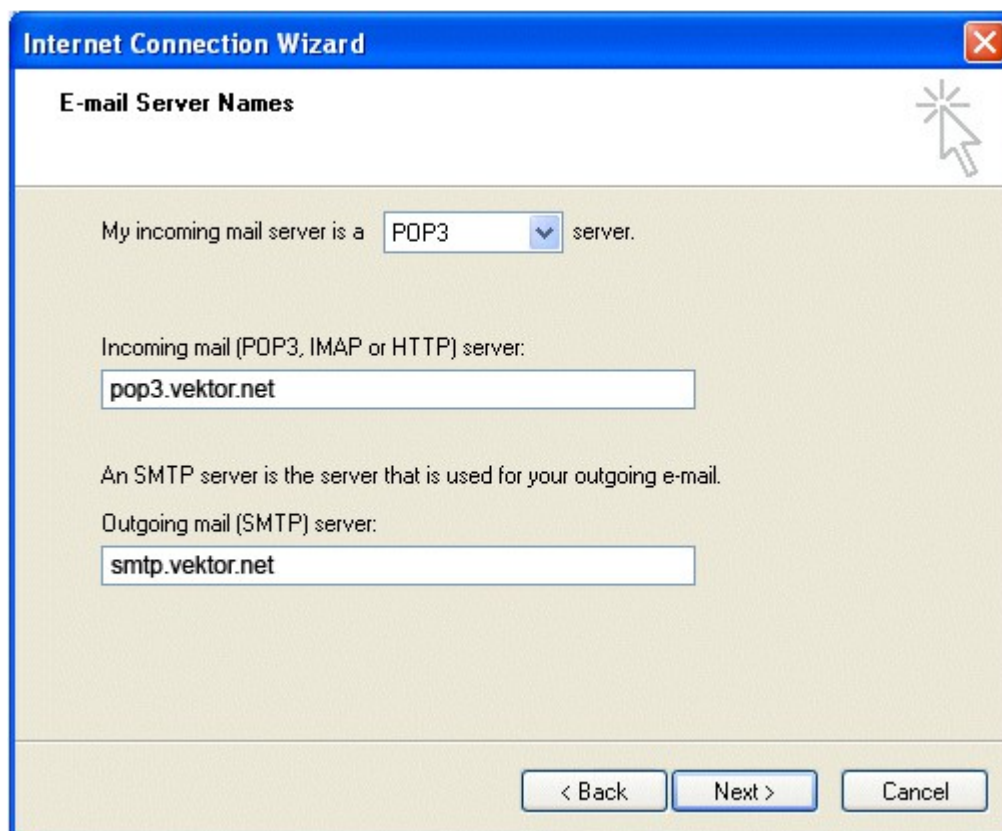

5. У поље “E-mail address” упишите вашу мејл адресу и кликните на “Next”.

The screenshot shows the 'Internet Connection Wizard' window, specifically the 'Internet E-mail Address' step. The window title is 'Internet Connection Wizard' and the subtitle is 'Internet E-mail Address'. Below the subtitle, there is a mouse cursor icon. The main text reads: 'Your e-mail address is the address other people use to send e-mail messages to you.' Below this, there is a label 'E-mail address:' followed by a text input field containing 'petar@vektor.net'. Underneath the input field, there is an example: 'For example: someone@microsoft.com'. At the bottom of the window, there are three buttons: '< Back', 'Next >', and 'Cancel'.

6. Потребно је изабрати опцију “POP3 server”.
Унесите исправне податке за vektor.net мејл сервер:

Incoming Mail: pop3.vektor.net
Outgoing Mail: smtp.vektor.net

The screenshot shows the 'Internet Connection Wizard' window, specifically the 'E-mail Server Names' step. The window title is 'Internet Connection Wizard' and the subtitle is 'E-mail Server Names'. Below the subtitle, there is a mouse cursor icon. The main text reads: 'My incoming mail server is a POP3 server.' Below this, there is a label 'Incoming mail (POP3, IMAP or HTTP) server:' followed by a text input field containing 'pop3.vektor.net'. Below this, there is a label 'Outgoing mail (SMTP) server:' followed by a text input field containing 'smtp.vektor.net'. At the bottom of the window, there are three buttons: '< Back', 'Next >', and 'Cancel'.

7. У поље “Account name“ упишите Ваше корисничко име.

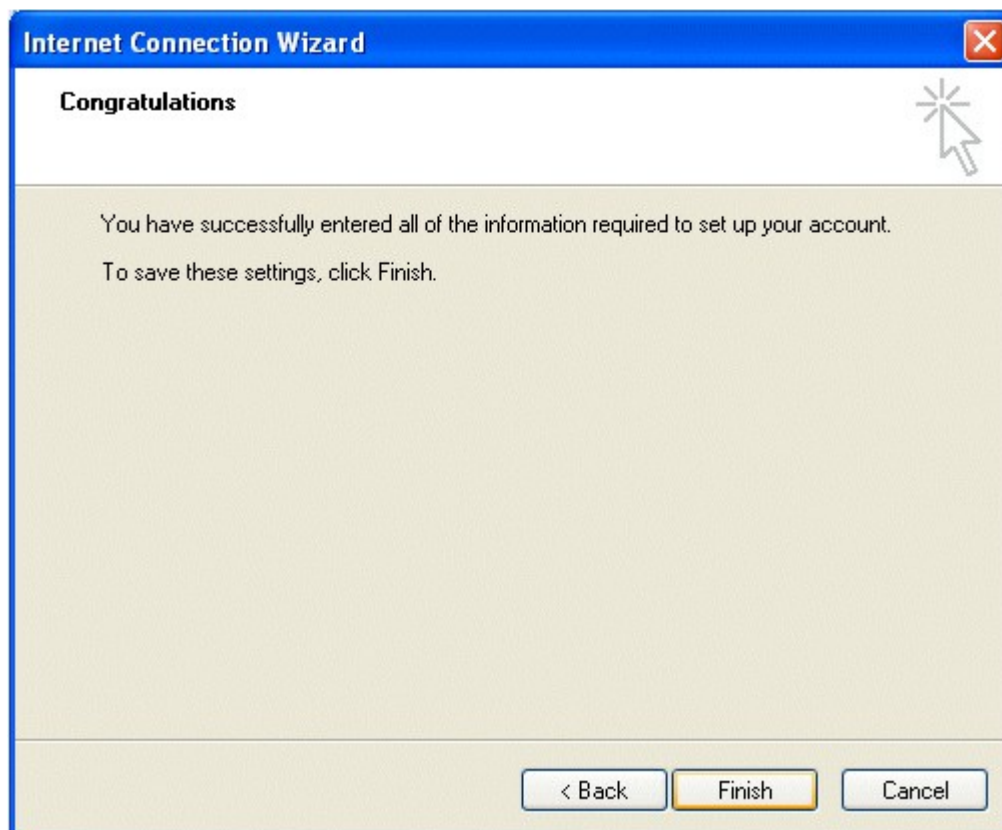

Корисничко име је део пре знака @ у Вашој мејл адреси.

8. У поље “Password“ упишите Вашу лозинку и кликните на “Next“.

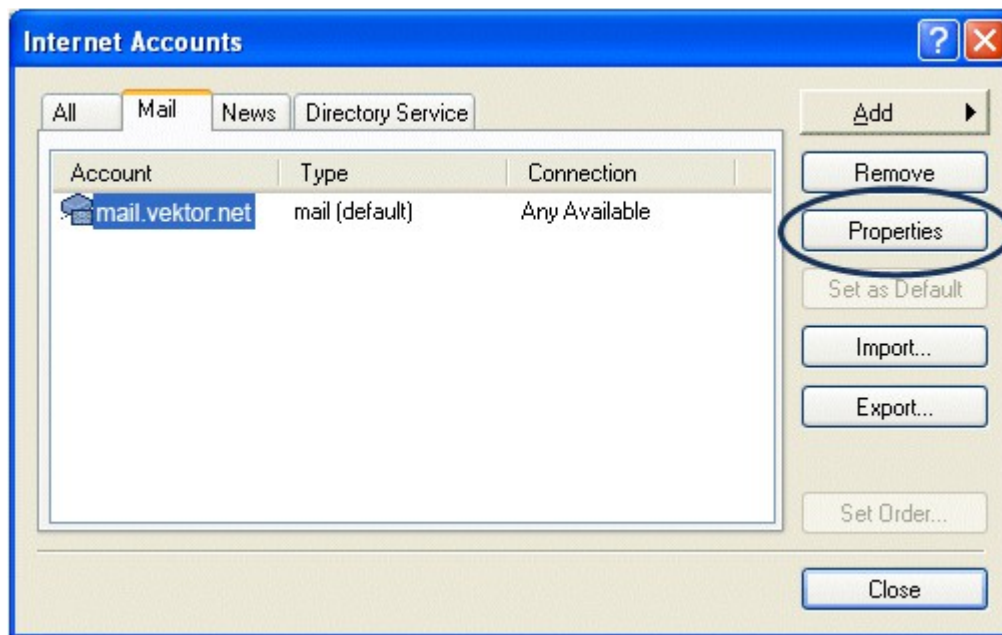

The screenshot shows the 'Internet Connection Wizard' window with the 'Internet Mail Logon' step. The window title is 'Internet Connection Wizard' and the subtitle is 'Internet Mail Logon'. The main text reads: 'Type the account name and password your Internet service provider has given you.' There are two input fields: 'Account name:' with the text 'petar' and 'Password:' with asterisks. Below the password field is a checked checkbox labeled 'Remember password'. Further down, there is a paragraph: 'If your Internet service provider requires you to use Secure Password Authentication (SPA) to access your mail account, select the 'Log On Using Secure Password Authentication (SPA)' check box.' and an unchecked checkbox labeled 'Log on using Secure Password Authentication (SPA)'. At the bottom, there are three buttons: '< Back', 'Next >', and 'Cancel'. The 'Next >' button is highlighted with a yellow border.

9. Кликните на “Finish“.

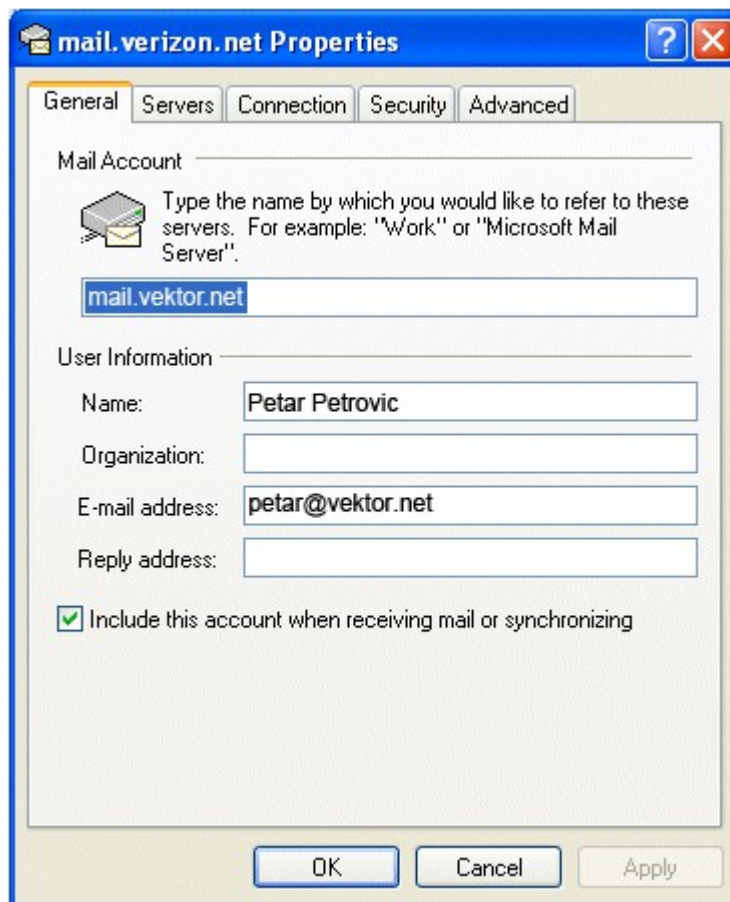

The screenshot shows the 'Internet Connection Wizard' window with the 'Congratulations' step. The window title is 'Internet Connection Wizard' and the subtitle is 'Congratulations'. The main text reads: 'You have successfully entered all of the information required to set up your account. To save these settings, click Finish.' At the bottom, there are three buttons: '< Back', 'Finish', and 'Cancel'. The 'Finish' button is highlighted with a yellow border.

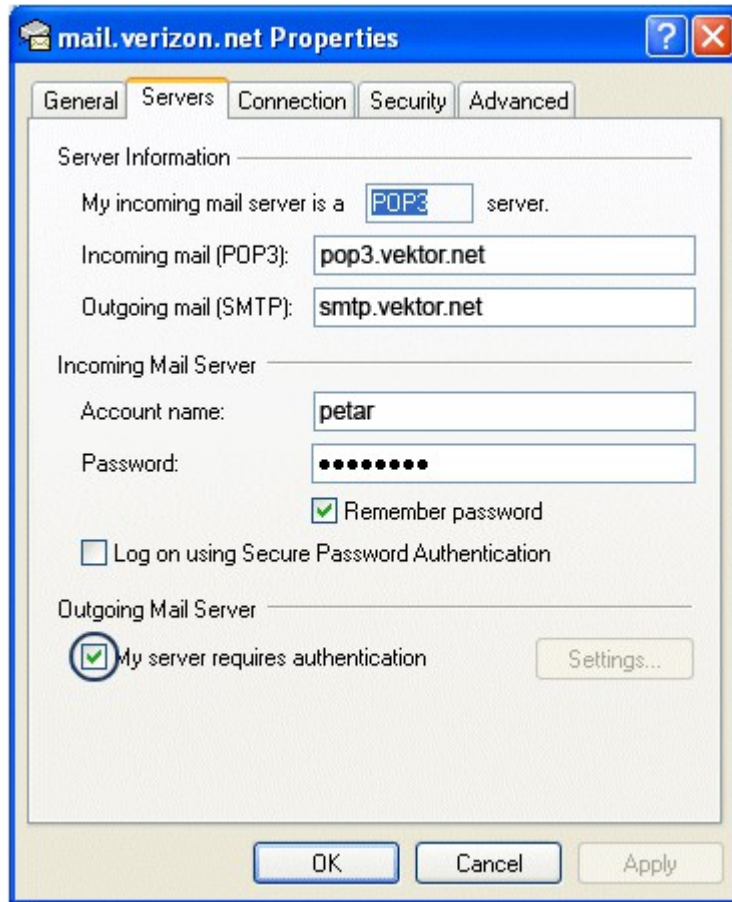

10. Након овога поновите други корак, из овог упутства, селектујте налог mail.vektor.net и кликните на дугме “Properties”.

11. У табу “General” проверите да ли су подаци исправни.

12. У табу “Servers” проверите да ли су подаци исправни и штиклирајте “My server requires authentication” и потом на опцију “Settings”.

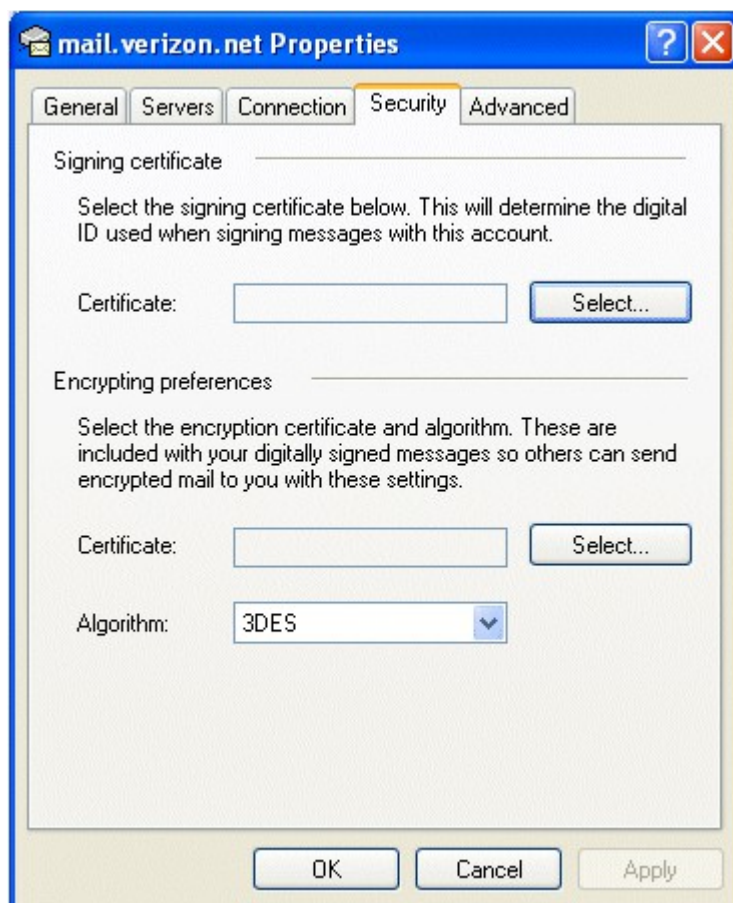

13. Потребно је изабрати “Use same settings as my incoming mail server”.

14. У табу “Connection“ проверити да није изабрана опција “Always connect to this account using“.

15. У табу “Security“ проверити да није ништа од сертификата изабрано.

16. У табу “Advanced“ проверити да ли је одлазећи сервер изабран порт 25, и да је за долазећи сервер изабран порт 110.

Проверити да нису изабране опције “This server requires a secure connection (SSL)“.

Потребно је и штикларати опцију “Delivery“ – “Leave a copy of messages on server“.
